

3 Big Reasons to use

- #1. Faster Weed Kill**
- #2. Healthier Crops**
- #3. More Profitable**

Herbolyte Plus is the ideal herbicide additive for better weed control and provides your crop with key nutrients to ensure active growth

ProfitCoat™ PB
A Dry Biological and Nutritional At-plant Seed Coating Formula

Ease of Use
Seed Lubricant
Beneficial Bacteria & Fungi
Early Growth Stimulation
Biot stimulants
Energy Supply

Bio-Empruv™

Residual late season protection!

Can be mixed with mineral applications as well as pesticides

NEW!

Goss's Wilt

ProfitPro®AG invites YOU to call in on the third THURSDAY of the month for the FREE TELECONFERENCE
A cost-effective and convenient way to gain knowledge on new crop production technologies

It's Easy . . . It's FREE
UPCOMING SUBJECTS

Thursday, June 16, 2016
8:00 p.m. Central Time

Benefits of Using Herbolyte™ Plus as a Weed Control Spray Adjuvant

Dennis Klockenga, ProfitProAG Consultant, will discuss how Herbolyte Plus controls weeds quicker and more effectively than AMS-based products while preventing the stall-out often seen with other products. It combines a water conditioner and a micronutrient solution in one simple-to-use product.
In 2011, Herbolyte Plus research showed an additional 3-4 bu/A increase on soybeans and a 4-5 bu/A increase on corn.

Profit from Biologically-Treated Manure

Bioaugmented manure can make a difference in your bottom line by providing many competitive advantages throughout your operation. Taking into consideration the rising costs of commercial fertilizers and fuel, it is imperative to utilize every benefit as much as possible. **Dr. Jim Ladlie, ProfitProAG President**, will discuss the competitive advantages of bioaugmented manure and how lower application rates of bioaugmented manure give equal or better crop response than raw manure.

For more information visit www.profitproag.com and click on "Monthly Teleconference."

Learn about the benefits HERBOLYTE PLUS and BIOAUGMENTED MANURE can have on your farming operation with this FREE Teleconference.

Unsecured and Secured Financing Available for 2016

Contact David Widman (who has over 30 years of bank lending experience, mostly in agriculture, and grew up on a family farm) about either input or operational financing for 2016 from AgriSpan. With qualified credit, an UNSECURED loan can range from \$10,000.00 to \$250,000.00; secured financing limit based on your operation. Call 507-640-1095 or email widmanag@gmail.com for details or to apply.

DIRECTIONS FOR CALLING IN

1. Dial the toll free number **1-855-212-0212** at 8 p.m. **SHARP** (Central Time) to get in from the beginning.
2. Enter the meeting ID No. **769-100-082#** (pound or hashtag key).
3. **All calls will be muted when joining the teleconference.**
4. **To ask a question** during the Q & A portion of the program, press *6 (star six). After asking the question please press *6 to re-mute your phone.
5. **NO FEE** or pre-registration required.
6. Access the teleconference anytime between 8 to 9 p.m. (CDT)

MANURE MANAGEMENT NEWS

Agronomic ROI for Manure Bioaugmentation

Application of bioaugmented manure results in improved soil health, plant health and agronomic performance. Research results and customers reports show a 5 to 15 percent increase in yield from applying bioaugmented manure versus raw manure. There are many benefits of bioaugmented manure, but the agronomic benefits alone more than justify the cost.

The following scenario show cases the economic benefit of bioaugmented manure.

Step	Crop: Corn		
1	Average yield	=	200 bu/acre
2	3% yield advantage of bioaugmented manure	=	6 bu/acre
3	Value per bushel	X	\$6.00
4	Income advantage per acre (yield advantage x value/bushels)	=	\$36.00
5	Acres treated with bioaugmented manure [amount of bioaugmented manure (700,000 gallons) ÷ gallons/acre (3,000 gallons)]	X	233
6	Increased revenue from bioaugmented manure (acres applied x income advantage/acre)	=	\$8,388.00
7	Cost of treatment of manure applied (700,000 gallons x \$0.002/gallons)	-	\$1,400.00
8	Income advantage (increase revenue – treatment cost)	+	\$6,988.00
9	Return on Investment (ROI) (increased revenue ÷ cost of treatment)		5 times

In this scenario, for every dollar spent, there was five times returned just on the agronomic benefits.

Bioaugmented manure advantages are:

Facility

- Less odor/gases
- Less flies
- Better working conditions
- Healthier animals
- Regain storage capacity
- Better equipment & facility longevity
- Reduced utility cost
- Reduction of foam
- Reduction of risk

Application

- Less agitation required
- Less foaming and full tank capacity
- Faster unloading
- More uniform application
- Less odor during handling & application
- Less chance of gassing animals
- Reduced risk exposure
- Better working environment
- Less pathogen risk between sites
- Easier cleaning & less corrosion of equipment

- Many producers are reducing their rate of bioaugmented manure (pre-digested manure) applied per acre and maintaining or increasing yields. If you can increase the amount of acres covered with the same amount of manure, what is that worth?
